Abstract

The Standard Linear integrated circuit market is diverse. It employs many suppliers whose combined sales reached over \$12 billion in 2004. The top five suppliers of standard linear in 2004 controlled well over half of the market and they are Texas Instruments, Analog Devices, National Semiconductor, Maxim Integrated Products, and Linear Technology.

This study presents market share data for 30 suppliers, covering 88% of the overall analog market. Market share data is given for 5 product categories including amplifiers, comparators, data converters, analog power, and interface.
